DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joseph Van Leeuwen on 6/5/2006 with respect to claims 1, 15 and 29.

The application has been amended as follows:

Claims 1, 15 and 29:

On line 7 of claim 1, after "retrieving one", please inserts ---or---.

On line 17 of claim 15, after "retrieve one", please inserts ---or---.

On line 9 of claim 29, after "retrieve one", please inserts ---or---.

Claim 27:

On line 1 of claim 27, please replace "12" with ---26---.

End of Amendment

Allowable Subject Matter

2. Claims 1-13, 15-27, 29-41, 43, 45-46, 48-49, and 51 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a system and method for providing caller information across heterogeneous networks. A Name Resolution Adapter (NRA) receives a message from a

destination central office that includes a caller's telephone number and a call recipient's telephone number. The NRA retrieves a call recipient contract and caller authorization entries, and identifies caller fields that the call recipient is authorized to receive. The NRA includes the identified caller fields in a message to a Service Control Point (SCP), whereby the SCP retrieves caller attributes corresponding to the caller fields from a Line Information Database (LIDB). The SCP forwards the caller attributes to the NRA. In turn, the NRA includes the caller attributes in a message and forwards the message to the call recipient over a computer network. The call recipient processes a corresponding telephone call using the caller attributes that are included in the message.

Prior art of record failed to teach in combination the method and system for providing caller information comprising: receiving a message corresponding to a telephone call, wherein the message includes an initiating caller number and a call recipient number, the telephone call received over a telephone network; retrieving one or more caller attributes based upon the initiating caller number, wherein the caller attributes are selected from the group consisting of a name, an address, billing information, service preferences, a birth date, and a social security number; and sending the caller attributes to a call recipient over a computer network, the call recipient corresponding to the call recipient number.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
